

History

"Fungiscope – Global Emerging Fungal Infection Registry" was established in 2003 with the aim to improve the knowledge on epidemiology, clinical manifestations and treatment strategies for invasive infections with so-called "emerging fungi".

Since its initiation centers from 45 countries have registered for Fungiscope, more than 435 cases have been documented and annual numbers are rising. Results have been presented at international conferences and published in peer-reviewed journals.

But Fungiscope is more than just a registry collecting clinical data, we also provide diagnostic support, collect and identify clinical isolates and provide a search engine for the database.

Visit www.fungiscope.net to explore the world of Fungiscope!

Number of New Cases

Coordinators

Chair

Oliver A. Cornely, MD, FACP, FIDSA, Cologne
Oliver.Cornely@ctuc.de

Coordinating Physicians

Maria J. G. T. Vehreschild, MD, Cologne
Maria.Vehreschild@ctuc.de
Kerstin Wahlers, MD, Cologne

Fungi scope

Global Emerging Fungal Infection Registry

Established in 2003

You are invited

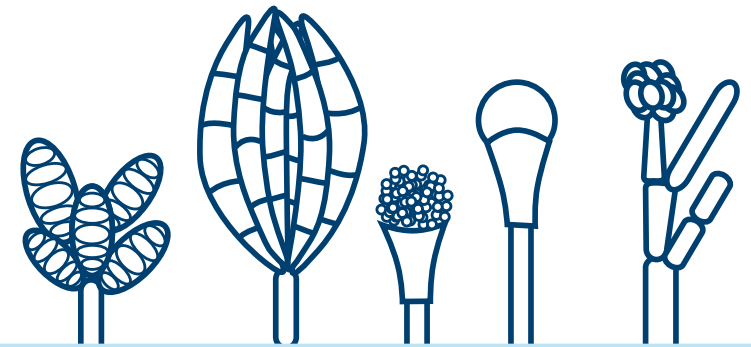

FungiThek

**Fungi
scope**

Fungiquest

Culture/Biopsy Banking

- Collection and reference analysis of cultured isolates and tissue samples
- Providing clinical isolates to cooperating centers for defined research projects
- Types of specimen: any, e.g. standard-, slant-, cryo cultures, formaldehyde fixated, paraffin-embedded, fresh frozen samples
- Tests performed: formal identification, susceptibility testing, broad-range PCR with sequencing and FISH
- Compensation: 50 €/sample provided

Address for samples:

Studienzentrum 2 für Infektiologie, Susanna Proske,
Herderstrasse 52-54, 50931 Köln, Germany

Therapeutic Drug Monitoring

- Determination of levels of all common azoles, echinocandins and polyenes in serum, CSF and other tissues
- Service is free of charge for the corresponding samples of documented cases

ClinicalTrials.gov Identifier: NCT01731353

Fungiscope provides

- Web-based registry
- Documentation of cases via www.clinicalsurveys.net
- Cooperation with other centers for joint analysis. Prior to sharing of samples or data, approval of the contributors of the respective cases will be obtained
- Authorship for contributing centers when cases are included in an analysis
- Compensation: 100 €/case

To register send an e-mail to
register@fungiscope.net

**New contributors are
cordially invited!**

We are looking for

- Cases of invasive infection (cultural, histopathological, antigen or DNA evidence) due to fungi other than: *Aspergillus* spp., *Candida* spp., *Cryptococcus neoformans*, *Pneumocystis jiroveci*, *Histoplasma* spp. or endemic fungi

If in doubt, whether your case is eligible, contact us
info@fungiscope.net

www.fungiscope.net

Searching the Data Base

- Intended to provide immediate information on anonymized cases
- Web-based search engine
- Provides information on clinical organ involvement, treatment and outcome of Fungiscope-registered cases
- No registration required
